Delete the "within two years" from the first paragraph (ISSUE). It is explained sufficiently later in the document.

Couple of corrections.

Paragraph 1 – I did not see anywhere in the June 20, 2013 ESB Report that recommended open burning within two years.

Paragraph 2 – According to news reports, the evacuation took place from November 30 – December 7, not November 28 – December 7.

Here is the latest and, I HOPE, final iteration of this fact sheet. Some of you have versions that were almost final ...please dump them and use this one.

Attached is the Executive Summary for our briefing for Senator Landrieu's staff next week. We also have a PowerPoint presentation and more detailed work plan that are being finalized today that I'll pass along. Call me if you have questions or suggestions for improving this summary.
